

Janes Electro-Optic Systems provides you with a complete profile of major military electro-optic systems and components, together with systems incorporating electrooptic elements in production, under development or inservice with the armies, navies and air forces throughout the world. This authoritative resource focuses on the entire range of thermal imaging, image intensifier and laser systems for surveillance, weapon sights, fire-control and reconnaissance, ensuring you stay on top of current developments in this key area. Each entry identifies the manufacturer, traces the development history and describes the operational characteristics. Also revealed are the main technical specifications to help you compare the performance of over 1,330 items of electro-optic equipment worldwide.
