

Biologist Louhi Virtanen came to the remote EU outpost to combine her shamanic skills with her scientific ones. Her ability to work within the world of the Spirits, the creatures the men call Night Demons, might foster an alliance, and help avoid war within the spiritual realms. As a biologist, she can assist Sigrid in the lab documenting pollution levels and the illegal dumping activities theyâ€™d discovered. She never imagined having to balance two men as well. Twins Marc and Hans Svetter were as different in personality as the two halves of Louhiâ€™s world. In body, both men were more than six-foot of masculine hotness, and her body craved to devour, and be devoured by both men. Except their secrets run deeper than hers, and when she pulls them into the spirit world, she discovers that these men, and their inner beasts, might be the key she needs. First, sheâ€™s going to have to help the team gather the evidence it needs, broker a truce, and also come to grips with her dual-life and the two men who make her desire to bring them all into balanceâ€and into love. This book contains two brothers loving the same woman. While the brothers are twins, there is not any m/m action in this book.
